

## Which domestic hot water cylinders? Our guide to our full range.

› Our SHZ models are highly compact wall mounted glass lined cylinders.

\*For additional residents in a scheme with the same supply requirements: on basic supply allow at least an additional 35 litres of store. For luxury supply allow at least an additional 45 litres.

\*\*For an additional sink or shower go up a size. For additional baths go up 2.

This assumes that not all outlets will be in simultaneous use. To increase recovery times for larger households, or those with high consumption, consider using several smaller cylinders equal to the same volume as one large one.
